

## **App Name**

SmartAssist Chatbot

## **Overview**

SmartAssist is a multilingual AI chatbot that can answer questions based on uploaded PDFs and transcribed videos.

## **Target Audience**

Businesses, educators, researchers, and developers looking for AI-powered document interaction.

## **Key Features**

- Multilingual Q&A
- Video-based content detection
- Instant document analysis
- Smart suggestions
- Offline and portable

## **How to Use**

1. Add your PDF files to the './pdf\_docs/' folder.
2. Launch the chatbot.
3. Ask questions in your preferred language.
4. Receive answers along with smart suggestions.

## **Privacy Policy**

SmartAssist does not store any user data permanently. All content is processed locally unless configured otherwise.

## **FAQ**

Q: Can I use SmartAssist offline?

A: Yes, using local LLM like LM Studio or Ollama.

Q: What languages are supported?

A: English, Hindi, Spanish, Telugu, and more.
